

DIESEL TECH STUDENTS

Student Assignment 4/9/2020 - 4/15/2020

Answer the following questions.

1. While discussing the danger of taking shortcuts during heavy vehicle service and repair, Technician A says that if you are an experienced technician, it is permissible to take shortcuts. Technician B says that in most cases, the time saved by taking a shortcut is nothing compared to the time spent recovering from an accident. Who is correct? Select one:

- a. Technician A
- b. Technician B
- c. Both Technician A and Technician B
- d. Neither Technician A nor Technician B

2. While discussing the possibility of an accident occurring, Technician A says fires and explosions are a constant hazard wherever there are flammable fuels. Technician B says poor lifting and handling techniques can cause chronic strain injuries, particularly to your back. Who is correct? Select one:

- a. Technician A
- b. Technician B
- c. Both Technician A and Technician B
- d. Neither Technician A nor Technician B

3. Technician A says that exposure to solvents may have long-term effects. Technician B says that accidents are almost always avoidable. Who is correct? Select one:

- a. Technician A
- b. Technician B
- c. Both Technician A and Technician B
- d. Neither Technician A nor Technician B

4. Technician A says a safe work environment would NOT include a workplace orientation given by the management. Technician B says a safe work environment would contain a workplace culture that supports safe work practices. Who is correct? Select one:

- a. Technician A
- b. Technician B
- c. Both Technician A and Technician B
- d. Neither Technician A nor Technician B

5. Which of the following bulb types presents an extreme fire hazard if broken in the presence of flammable vapors or liquids? Select one:

- a. Incandescent bulbs
- b. LED bulbs
- c. Fluorescent bulbs
